DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on February 21, 2007 has been entered. No claims have been amended. Claims 9, 28, 38, and 45 have been cancelled. No claims have been added. Claims 1-8, 10-27, 29-37, 39-44, 46, and 47 are still pending in this application, with claims 1, 12, 13, 14, and 15 being independent.

Allowable Subject Matter

2. Claims 1-8, 10, 11, 13-20, 31-37, 39-44, 46, and 47 are allowed.

3. The following is an examiner's statement of reasons for allowance: The invention as claimed is not disclosed nor rendered obvious in view of the prior art of record. As to independent claims 1, 13, 14, and 15, the prior art of record fails to teach or suggest, alone or in combination, the recited method and apparatus, of automatically provisioning network service for a customer premises equipment of a subscriber in a next generation digital telecommunications network, which allocates and reserves network addresses for a voice signaling channel and a bearer channel associated with communications between the customer premises equipment and the network, updating a domain name service server with information that associates the allocated and reserved network addresses with the customer premises equipment, reserving network addresses with the customer premises equipment, and creating and storing one or more mappings for the permanent virtual circuits in a switch device that directs network

Art Unit: 2614

communications to the customer premises equipment. No prior art was found that discloses or teaches the limitations of claims 1, 13, 14, and 15.

4. Claims 2-8, 10, 11, 16-20, 31-37, 39-44, 46, and 47 are dependent upon claims 1, 13, and 15, respectively, therefore, claims 2-8, 10, 11, 16-20, 31-37, 39-44, 46, and 47 are allowed.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 12, 21-27, 29, and 30 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

7. Independent claim 12 recites "a computer-readable medium", and on pg. 54, lines 12-16, of Applicant's specification, the computer-readable media is disclosed as being "a carrier wave", thus directing the claimed invention, of claims 12, 21-27, 29, and 30, to non-statutory subject matter.

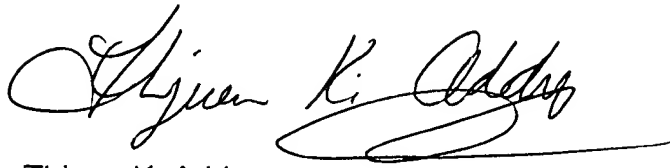

8. When nonfunctional descriptive material is recorded on some computer-readable medium, in a computer or on an electromagnetic carrier signal, it is not statutory since no requisite functionality is present to satisfy the practical application requirement.

Merely claiming nonfunctional descriptive material, stored in a computer-readable medium, in a computer, on an electromagnetic carrier signal does not make it statutory. A claim reciting a signal encoded with functional descriptive material does not fall within any categories of patentable subject matter set forth in 35 U.S.C. 101. A claimed signal is clearly not a "process" under 35 U.S.C. 101, because it is not a series of steps.
